FOR IMMEDIATE RELEASE

SPATIALinfo and CCI Systems Announce Partnership to Offer Complete Network Design Solution

Partnership provides customers with an easy solution to convert legacy data

ENGLEWOOD, Colo., and IRON MOUNTAIN, Mich., October 28th, 2009—SPATIALinfo and CCI Systems today announce the formalization of their long-established relationship to improve both company's ability to assist cable, and telecommunication companies in implementing SPATIALinfo's network management software solutions. CCI's end-to-end design and engineering services coupled with SPATIALinfo's spatialSUITE™ software gives the cable industry a beginning to end solution for deploying network management solutions.

"This is a complete solutions package for those customers needing to convert legacy data or those who wish to begin building their network on a GIS platform. CCI can provide every part of the process, from engineering to construction to support, and utilize the best solution, SPATIALinfo software, for the design and documentation process," said CCI Vice President of Engineering Operations Rick Hurzeler.

The cable industry, universities, departments of transportation and others with communication networks are aggressively pursuing options that allow implementation of robust network management software tools to design, update and manage their networks. CCI's experience in using SPATIALinfo's software solutions in acquiring, converting and populating network data saves valuable implementation time, and increases the return on investment for customers. This partnership also formalizes CCI as an authorized reseller of SPATIALinfo's software products, providing customers with a one-stop shop for implementing spatialSUITE software.

"By formalizing this partnership, SPATIALinfo continues to provide opportunities for our customers to have the best results in solving their network management issues. CCI Systems offers the best solution from design to support, and offers superior knowledge in network management issues," said SPATIALinfo Chief Executive Officer Greg Foster.

About SPATIALinfo

SPATIALinfo specializes in developing network-management software solutions for the cable, telecommunication, utility, and transportation industries. Our spatialSUITE™ products make it easy for professionals to map, modify, model, and manage complex fiber, copper, and RF cable networks. With strong partnerships and loyal customers, SPATIALinfo has become an international leader in developing off-the-shelf network-management solutions that offer a proven return on investment.
