FOR IMMEDIATE RELEASE

SPATIALinfo Launches Partner Certification Program for Elite Engineering Firms

Englewood, Colo., Sept. 28, 2010—SPATIALinfo has launched a partner certification program in response to customer demand for engineering support that includes design, drafting and modeling of fiber, coaxial, copper and inside plant networks. [SPATIALinfo certified partners](#) are elite engineering firms with expertise in network design, drafting and data migration. After purchasing licenses and completing intensive spatialNET training, partners are certified at platinum, gold or bronze levels.

CCI Systems has provided specialized engineering services in fiber, FTTH, RF, route and ISP to SPATIALinfo since 2003. Their purchase of more than 20 spatialNET licenses and successful completion of specialized training make them a platinum certified partner.

“We are proud of our [SPATIALinfo platinum certification](#) and our longstanding relationship with the leader in GIS-based software solutions for cable and telecommunications. Together, we enable service providers to better utilize and maintain their networks. CCI is enthused to team with SPATIALinfo to make better communications possible through innovative network solutions,” said John Jamar, CEO of CCI Systems.

SPATIALinfo products manage nearly 50% of North American cable networks. Increased demand make certified engineering partners critical to supporting industry needs using SPATIALinfo’s spatialNET.

“Our certified partners play a key role in meeting our customers’ needs. With more cable and telecommunications companies managing their networks in [spatialNET](#) and utilizing [spatialOFFLINE](#) and [spatialWEB](#) to leverage network assets, it is imperative that we help develop a strong community of qualified engineering firms to support them,” said SPATIALinfo CEO, Greg Foster.

Details about SPATIALinfo’s partner certification program and all of SPATIALinfo’s certified partners, including CCI Systems, are listed at www.spatialinfo.com.

About SPATIALinfo

SPATIALinfo specializes in developing network-management software solutions for the cable and telecommunications industries. SpatialSUITE™ products make it easy for professionals to map, model and manage complex fiber, copper and RF cable networks. With strong partnerships and loyal customers, SPATIALinfo is an international leader in developing off-the-shelf network-management solutions that offer a proven return on investment. For more information, call Bill Scheffler at 303-810-4048 or visit www.spatialinfo.com.

About CCI Systems

CCI is the nation's premier end-to-end solutions provider of communication network services. From humble roots in Iron Mountain, Mich., CCI pulls from more than 50 years of industry experience to deliver flexible, custom solutions that work today and meet the needs of tomorrow. For more information, call 1.800.338.9299 or visit www.ccisystems.com.
